

40 Piece Paint On Wood Christmas Ornaments Set Instructions

READ INSTRUCTIONS COMPLETELY BEFORE YOU START!

Adult supervision is highly recommended. Children should wear protective clothing. Work over a large piece of scrap paper when painting.

Preparing Your Ornaments For Painting

To remove the Ornaments from the Wooden Sheet, carefully press downward from the front side along the cut edge of the individual Ornament with thumbs. Support the underside of the Ornament with your finger as shown in Diagram #1

How To Open Paint Containers

Hold the container tabs with your thumb and index finger. Press top tab down firmly until lid pops open as shown in Diagram #2. Simply snap container lid back on when you have finished using that color to prevent the paint from drying out. If your paint should become too thick, stir in a small drop of water. Do not thin too much as the paint will not cover as well.

Keep Your Brush Clean

When changing colors, wash your brush thoroughly with water. Using a soft cloth, wipe excess water from your brush. Do not let paint dry on your brush or paint containers! Wash the brush and close the paint containers when not painting!

String The Ornaments

After Ornaments have completely dried, measure and cut the Gold Hanging String into 6-inch pieces. Slip one end through the hanger hole in the Ornament, then tie both ends together with an overhand knot as shown in Diagram #3.

Your Ornaments are now ready for family and friends to admire. In addition, you can use them as Tree Decorations, Gift Tags, Window Ornaments, Holiday Wreath Toys, Stocking Decorations and Gifts!

WARNING: CHOKING HAZARD-

Small Parts and Sharp Points: Not for children under 6 years old

Nontoxic

Conforms to ASTM D-4236

Made in China
